M. S. KELLOGG, Proprietor

JANESVILLE, WIS.

ANNOUNCEMENT

IN PRESENTING this, our 56th Annual Price List, we do so believing that our efforts in the past have been appreciated in endeavoring to supply our customers with nursery stock of the best quality and at prices as low as is commensurate with No. 1 stock.

The business will be conducted along the same lines as we have followed in the past, viz: selling direct to the planter. We employ no agents. Anyone who states he is acting as agent for us is a fraud. Send your order direct to a reliable old established firm and save a large commission from the middleman.

We offer a large stock of trees, plants, etc., of the best standard varieties, well grown and thrifty, handled and packed under cover, with no exposure to sun or wind. Packing is done by experienced hands under our personal supervision.

We guarantee goods to arrive at destination in good order, after which our responsibility ceases.

We thank you for past favors and solicit your further orders, and all orders sent us will receive our most careful attention.

KELLOGG'S NURSERY,

M. S. Kellogg, Prop.

GUARANTEE—We exercise the greatest care to have all stock true to name and grade and satisfactory in every way, but it is hereby agreed between the purchaser and ourselves that should any stock not prove true to name, on proper proof, we will replace it or refund the purchase price, but shall not be held for further damage.

CLAIMS—All claims for shortage, errors, etc., must be made within **FIVE DAYS** of receipt of stock, or same will not be allowed. Mistakes do occur; but we are always willing to do all we can to correct any errors for which we are responsible. But in making complaints be reasonable.

ORDERS are acknowledge at once upon receipt of same, and should you fail to receive an answer in ten days write us again. Always give your name and address and write same very plainly; also give full shipping directions.

Order early before the assortments are broken and thereby avoid disappointment and possible delay.

Orders are shipped in rotation, as far as possible, and late ones must take their turn.

SUBSTITUTION—When any variety or grade is exhausted we reserve the right to substitute, or to put in a smaller grade of trees, unless otherwise stated in the order, but in this case the true name will always be on such stock, and full value sent if smaller grades are used. We furnish 6 at

dozen, 50 at hundred and 500 at thousand rates, and allow an assortment of varieties.

TERMS—CASH with order.

Plant With Care, and see that the earth is packed firmly about the roots and that all trees planted are thoroughly wet down and well mulched. The ground should be well prepared before planting and given thorough cultivation afterwards.

On receipt of stock, dip roots in water and bury in moist ground, except strawberry and raspberry plants, which should not be wet, but open the bundles and spread out, packing the soil firmly to the roots. All stock should be set out as soon as possible.

To parties wishing same, a short list of instructions in regard to planting and cultivation of stock, spraying and formulas, will be mailed on request.

Any information not given in this list will be furnished on application.

PACKING CHARGES—Bales of less than 50 trees, 25c; 50 to 100 trees, 50c; 150 trees, 75c. Where more than 150 trees are ordered they will have to be boxed, in which case no charge will be made for packing except the cost of boxing, as follows: 30 by 30 inch heads, \$2.50; 24 by 24 inch, \$2.00; 18 by 18 inch, \$1.50; all 8 to 10 feet long. No charge for packing small fruit plants at the list price, or for cartage. We have United States, Wells Fargo and American Express Companies and C. & N. W. R. R., C., M. & S. P. R. R. and Rookford, Beloit & Janesville Electric Railway Company.

APPLE TREES

In the propagation of this fruit we use as nearly all nurserymen do, the piece root graft, using a long cion and a short root. The experience of over half a century has demonstrated that such trees are better for the north than either whole root grafts or budded trees. When the long cion and short root is used the lower part of the cion (which is all below ground except the upper two inches) will nearly always start roots, and these being the same variety as the cion makes the tree hardier and longer lived. Our grafts are made here by experienced men under our personal direction.

Owing to the shortage of apple trees this season prices are somewhat higher than for some years and our stock of trees will be exhausted long before the season is over. If you need trees get your order in early as the demand promises to be heavy owing to many putting out commercial orchards.

We have some varieties in stock not listed. Varieties marked thus * are recommended for the extreme north.

SUMMER VARIETIES.

YELLOW TRANSPARENT — (Russia) Medium, roundish conical, light yellow, juicy, sub-acid. One of the best early varieties. July-August.

***DUCHESS**—(Russia) Large roundish, flattened, light yellow covered with stripes and splashes of dark crimson, firm, sub-acid. August-September.

***IOWA BEAUTY**—(Iowa) Large, roundish, irregular, golden yellow, striped dark red, juicy, acid. September.

***TETOFISKY—**(Russia) Medium size, roundish oblate, yellow, striped with red, juicy, sprightly sub-acid. Very hardy. August.

FALL VARIETIES.

McMAHON—(Wis.) Large, roundish, lightly flattened, light yellow to white, crisp, juicy, sub-acid. October.

WOLF RIVER—(Wis.) Very large, roundish, irregular, yellow, covered with dark crimson, coarse grained, juicy. October-December.

***WEALTHY—**(Minn.) Medium to large, roundish oblate, striped, bright crimson to dark solid red. A very attractive fruit. Very juicy, sub-acid. October-January.

***HIBERNAL—**(Russia) Large, roundish, flattened, green striped with red, juicy, firm, acid, (cooking). September-November. One of the hardiest varieties known.

***PLUMBS CIDER—**(Wis.) Large, roundish, conical, green with red stripes, firm, juicy, fine grained, sub-acid. October-January.

PEERLESS—(Minn.) Medium to large, roundish, conical, greenish, striped with dull red, firm, sub-acid. October-January.

FALL AND WINTER.

***LONGFIELD—**(Russia) Medium, roundish conical, light yellow with red blush, very juicy, sub-acid. October-December.

***PATTEN'S GREENING—**(Iowa) Large, round, slightly flattened, yellowish green with bronze blush, sub-acid. October-January.

AMEUSE OR SNOW—Medium, roundish, flattened, deep solid red, sometimes striped, juicy, fine grained, mild sub-acid. October-January.

DOMINION WINTER—(Can.) Medium size, yellow with fine black dots, fine grained, mild, sub-acid. October-January.

BROUGHTON SWEET—(Wis.), Large roundish, flattened, green and yellow with fine dots, firm, juicy sweet. October-January.

WINTER VARIETIES.

PEWAUKEE—(Wis.) Large, roundish, irregular, striped with dull red, mild sub-acid. December-February.

***NEWELL**—(Wis.) Large, roundish, deep yellow with slight blush, juicy, sub-acid, January-March.

TALLMAN SWEET—Medium, round, whitish yellow, juicy, mild, sweet, January, March.

FLUSHING SPITZENBURGH—(N. E.) Medium to large roundish, conical, greenish yellow with red splashes and stripes, juicy, crisp, nearly sweet. October-February.

SALOME—(Ill.) Medium size, roundish, conical, yellow with large light colored dots, mild sub-acid. Good. January-May.

***MALINDA**—(Minn.) Large roundish, conical, green, firm, sweet. January-May.

***SCOTTS WINTER**—(Vt.) Medium, roundish, oblate, red striped to dark red, juicy, sub-acid. February-April.

WINDSOR (WINDSOR CHIEF)—(Wis.) Medium, oblate, slightly conical, light greenish yellow covered with marbled dull red and russet, fine grained, spicy, sub-acid. Very good. December-May.

***N. W. GREENING**—(Wis.) Large, roundish, oblong, regular, yellowish green, firm, mild sub-acid. February-May.

BEN DAVIS—Large, roundish, conical, light to dark red, striped, coarse grained, mild sub-acid. February-May.

***WALBRIDGE**—(Ill.) Medium, roundish oblate, green yellow with pale red stripes, mild sub-acid. February-May.

CRABS

HYSLOP—Large, roundish, tapering dark solid red, acid. October.

***SWEET RUSSET**—Large, roundish oblong, greenish yellow, mild, sweet. September.

***VIRGINIA**—Medium, roundish, flattened, nearly solid red, very juicy, acid. September-November.

***WHITNEY NO. 20**—Large, roundish, oblong, waxy yellow covered with dark red, juicy, mild sub-acid. August-September.

***TRANSCENDENT**—A standard variety, large, roundish oblate, yellow with red blush, firm sub-acid. September-October.

PEARS

	Each	Doz.	100
5 to 7 feet	\$.35	\$3.00	\$25.00

DUCHESS DE ANGOULEME — Very large, oblong, greenish yellow, juicy, good quality. July.

BARTLETT—Large, oblong, yellow, fine grained, juicy, sweet. September.

FLEMISH BEAUTY—Large, yellow with reddish brown tinge, juicy, sweet. September.

CLAPP'S FAVORITE—Large, ovate, pale yellow, juicy, melting. September.

KIEFFER—Large, oval, yellow with light blush, coarse grained, very hardy. October-December.

PLUMS

We propagate mainly of the native varieties (*Prunus Americana*) as we find they are much more reliable than the European or Japan sorts.

Using the piece root graft and hardy native seedling.

A most satisfactory fruit, especially for exposed or unfavorable locations. Will grow anywhere, even on poor ground; fruits well even under neglect and is perfectly hardy.

HYBRID PERPETUALS.

GEN. JACQUEMINOT—Deep red, free
 bloomer, fragrant, large size, one of the
 finest.

M. P. WILDER—Deep red, one of the
 finest red roses. Large size and full. Free
 bloomer.

ULRICH BRUNNER—Bright red, large size, fragrant. Very fine.

CLIO—Pink, large, fine in form either as bud or open flower. Very free bloomer. The finest pink Hybrid Perpetual.

JOHN HOPPER—Pink, large and full and a free bloomer; fragrant.

MADAM PLANTIER—White, large size and very full, very hardy.

COQUETTE DES BLANCHE — White medium size and full. Bloom in clusters. One of the best.

ANNA DE DIESBACH—Brilliant rose, large and very fragrant. Vigorous grower and persistent bloomer.

MAGNA CHARTA—Bright pink suffused with carmine, large size. Strong upright grower, vigorous and healthy. One of the best.

PAUL NEYRON—The largest rose in cultivation, blooms often measure five inches in diameter; strong, vigorous grower. Pink. Very fresh and attractive.

ROSA RUGOSA ALBA—Bright shiny green foliage, flowers pure white, blooms in clusters. Very hardy; needs no winter protection.

MOSS ROSES.

BLANCHE MOREAU—Vigorous grower and hardy. Flowers white, large, full and perfect in form.

LUXEBURG — Bright crimson, large size and beautifully mossed.

CLIMBING ROSES.

DOROTHY PERKINS—Beautiful shell pink, full and double, large size for cluster rose. Closely resembles the Crimson Rambler.

CRIMSON RAMBLER—The most beautiful crimson climbing rose. Flowers in large pyramidal clusters of from 30 to 40 blooms. Strong grower and hardy.

WHITE AND YELLOW RAMBLERS—similar to the Crimson Rambler.

BALTIMORE BELLE — Blush white changing to white, blooms in clusters, flowers large and full.

QUEEN OF PRAIRIE—Pink, large, full, vigorous grower and blooms freely.

SHRUBS

2 to 3 feet.

25c Each. \$2.50 per Doz., Except as Noted.

SPIREA VAN HOUTTII — (Bridal Wreath) Large white flowers, early bloomer. "A snow bank of bloom." The finest of all the shrubs.

SPIREA BUMALDA—Dwarf but vigorous grower, blooms freely during mid-summer and autumn. Rose color. Very desirable.

SPIREA SORBIFOLIA—White, medium size, vigorous grower. August.

SPIREA BILARDI—Bright with dense panicles of rich pink flowers. July-August.

GOLDEN ELDER (*Sambucus Aurea*)—Beautiful golden yellow foliage, fine for single specimens or used in massing or alone with other shrubs.

SNOWBERRY (*Symphoricarpos Alba*)—vigorous and hardy. Berries white.

INDIAN CURRANT (*Symphoricarpos Rubra*) Similar to above, berries red in color.

BERBERIS THUNBERGII—Dwarf in growth with graceful drooping branches. Yellow bloom, scarlet fruit, foliage green changing to scarlet and gold in the fall.

PURPLE LEAVED BARBERRY—Very similar to the common barberry but differs in that the foliage is a rich purple.

COMMON BARBERRY—A hardy native shrub, strong, vigorous, upright grower, foliage green, fruit dark red,

GOLDEN WILLOW, LAUREL LEAF WILLOW, JAPAN QUINCE—Much used in massing shrubs and are valuable in this connection.

WEGELIA ROSEA—Blossoms in June, large trumpet shaped flowers of rose color that fade to nearly white. Very desirable.

WEGELIA VARIEGATED —Resembles Wegelia Rosea; has variegated green and white leaves. Very choice.

WEGELIA Eva Rathka—Similar to W. Rosea but has very fine dark rich red blossoms. Very choice. Each, 35c.

HYDRANGEA P. G.—A fine shrub, blooms August and September; large, white flowers, Pyramidal shape, often a foot long. This can be pruned into tree form and will make a very large shrub, often upwards of eight feet in height.

SYRINGA (Alba Grandiflora)—A large vigorous, upright growing shrub. Flowers white, blooms very freely in June.

LILACS—Purple, white and variegated.

SNOWBALL—A well known shrub, large white flowers latter part of May.

HONEYSUCKLE—(Bush) Red and white. Blooms in June.

CLIMBING VINES

25c each; \$2.50 doz.

SCARLET TRUMPET HONEYSUCKLE—(Climbing) Red, strong, rapid grower, blooming all summer.

BITTER SWEET—One of the best native climbing vines, a vigorous grower and free

bloomer, and very ornamental, even in late fall with its bright red berries, which it retains all winter; needs no protection.

JAPAN IVY—One of the hardy climbers, clings to the smoothest surface.

AMERICAN IVY—(Virginia Creeper) Native climber too well known to need description.

CLEMATIS

In planting the clematis be careful to put them in quite deeply even to 4 or 6 inches below the surface. This will often prevent loss by the breaking off of the vine just where it leaves the root. Also be sure they are well firmed in to prevent drying out.

2-Year, 35c each. \$3.00 per dozen.

JACKMANII—Large, rich violet purple.

HENRII—Very large single white.

MAD. E. ANDRE—Crimson red, large free bloomer.

PANICULATA—Very rapid grower and profuse bloomer. Thrives anywhere. Blooms from summer till frost; flowers small, pure white. The most satisfactory of all the Clematis.

Each Doz. 100

PEONIES— Red, white and pink \$.25 \$2.50 \$15.00

DAHLIAS— Red, white, lavender, variegated25

GERMAN IRIS (Fleur de Lis)—The iris thrives best in a moist soil. If this cannot be had, water should be supplied generously while growing and blooming. Can supply in blue, bronze or straw color .25

STRAWBERRIES

To this department we give special attention and the plants we offer are equal to any grown, are carefully graded and no small, inferior ones sent out; they are fresh dug from new beds that have never fruited, and are shipped to our customers while in fresh, vigorous condition. They are not held in the packing house till half their vitality is gone. We ship in baskets or light boxes, and all plants are neatly trimmed and tied in bunches of 25. They are carefully packed and we guarantee them to arrive in good condition when shipped by express; we do not recommend freight shipments with this class of stock.

Those varieties which are strong growers and make a heavy stand of plants are more reliable than those which only make a moderate growth. When we prove a variety to be inferior to the standards it is discarded, and while all varieties may not succeed the same as with us, we judge them by actual test in field culture growth with the object of marketing fruit at a profit.

We will furnish plants at the thousand rate in assortment of varieties not less than 250 of a variety. At the hundred rate we will furnish assortment not less than 25 of a variety. Special prices quoted on lots of 20,000 or more.

Plant two by four feet on thoroughly prepared ground, cultivate often and when you have a solid matted row two feet wide, restrict the growth, (don't let a weed grow) mulch in fall with straw or some coarse material free from weed seed, remove a part of it the following spring and place between the rows as mulch.

Varieties marked "Imp." are imperfect in blossom and must be set with "Per." perfect flowering kinds.

Varieties marked * we especially recommend for general cultivation.

NOTICE—The prices below are for plants spring of 1910. To those needing plants the coming August or September we will quote prices after August 1st.

We carry a stock of berry boxes and will quote prices on application.

The past season has been more favorable to a good growth of plants than was the summer of 1908. We have a fairly good stand of plants but as the demand is very great we advise ordering early if you wish to be sure of your plants. Many will be disappointed who delay ordering until planting time and then find the grower is sold out. Order now.

If you want the best plants, true to name, and properly handled, place your orders with us. We guarantee satisfaction and will be pleased to have you visit our nursery and inspect the stock.

Plants offered are of **OUR OWN GROWING**.

Doz. 100 1000

AROMA— Per Medium to large, roundish conical form, berry bright red and of good quality. Plant strong but not a free runner; moderately productive, season late\$.25 \$.60 \$ 5.00

AUTUMN,—Imp., a medium sized plant, vigorous grower making a fair stand of plants. Berry is of medium size, roundish conical, glossy red, firm and of fair quality. It is a fall or everbearing variety but as it is imperfect must have some other variety to pollenize it. For

fall fruiting the buds and blossoms should be removed until June or July. Very productive. 2.00

***BEDERWOOD** — Per., Medium size, roundish regular form, moderately firm, very productive and of good quality. An early variety of strong vitality and profitable for near market25 .60 3.50

BRANDYWINE— Per. a large late dark red berry of good quality. A large plant carrying the bloom high, somewhat above the foliage, is easily affected by frost. One of the best late varieties 25 .60 4.50

***CLYDE**—Per. Large to very large roundish regular form, bright scarlet, moderately firm, good quality, mid-season to late. A strong plant but not a free runner, yet producing large crops of fine fruit which hold to the end of season. Is one of the best all 'round varieties for home or market25 .60 5.00

CRESCENT—Imp., Medium size, plant a vigorous grower and very productive. Berries run small at last picking but it is still largely grown25 .60 3.50

CARDINAL—Imp. Medium to large, nearly round, smooth and uniform, bright red and of good

quality. Ripens evenly;
no green tips. Flesh dark,
firm, mid-summer to late.
A new variety of merit. .50 3.00

COOPER—Per. Mid-sea-
son to late, large size,
conical, dark red, of fine
quality and firm enough to
ship. We have fruited this
one season and it was
fairly productive. .50 2.00

ENHANCE— Per. Late,
very productive, medium
to large, irregular shape,
a good shipper .25 .60 3.50

GLEN MARY — Per.
Very vigorous and produc-
tive, large size, irregular
shape, very firm, late
ships well. Does not al-
ways ripen evenly, plants
are large but not free run-
ners .25 .60 4.50

HAVERLAND — Imp.
Early, medium size, con-
ical form, light color, in-
clined to be soft. Plant, a
good grower and for home
market is all right .25 .60 3.50

HIGHLAND—Imp. Medi-
um to large, bluntly con-
ical. Bright scarlet, color
extending through the ber-
ry. Plants large, strong
and vigorous. Bloom im-
perfect and quite resistant
to cold. Firm enough to
ship, but not for excessive-
ly long distances. Very
productive. A new vari-
ety from which we expect
great results 1.00 7.00

and of good quality. The spring fruit buds should be kept off to secure fruit in the fall. The best variety with which to pollinize the Autumn. It makes but few plants and these mainly by stooling out from the parent plants making few if any runners. 2.50

***PARSON'S BEAUTY —**

Per. Medium to large, roundish, conical form, dark red, firm and a good shipper, mid-season. A large, strong plant and a free runner; produces large crops of fine fruit, berry holding size well to the end of season.25 .50 4.00

***SPLENDID—**Per. Very productive, firm, medium to large, roundish regular form and of first quality; a vigorous grower but inclined to rust, yet it is one of the good market varieties25 .60 3.50

***SAMPLE—**Imp. Medium to large, roundish conical, dark red, very firm, quality good, a strong vigorous grower and very productive, season late, and a first-class market berry. One of the best pistillates we have..... .25 .60 4.00

***SENATOR DUNLAP —**

Per. Medium to large, conical, dark red, firm and of first quality, mid-season. A vigorous grower and usually makes too many plants

for best results, unless growth is restricted. It is as productive as Warfield, berries are better colored and a third larger. One of the best market varieties and no list is complete without it25 .60 3.50

SARATOGA—Per. A seedling of Sample and Glen Mary and resembles both somewhat. Vigorous healthy grower. Medium to large size, deep red, roundish, and of good quality. Mid-season. Very productive; having been picked at the rate of 5000 qts. to the acre at a single picking50 2.00

STEVENS LATE CHAMPION — Per. Large size long, slightly flattened, bright red, firm and of fair quality. The flowers and berries are well protected by the ample foliage. Will keep well after being picked50 2.00

* **WARFIELD** — Imp. Medium size, roundish conical, dark red, very firm and a good shipper. A leading market variety; perhaps more largely grown than any other. This and Senator Dunlap make a fine pair25 .60 3.50

SEED CORN

We offer a limited quantity of the following varieties. Seed has been gathered before severe weather, much of it being

picked from the hill and is fire dried and tested. However we give no warrantee expressed or implied and we do not guarantee a crop.

REIDS YELLOW DENT.

A standard variety of yellow dent, widely grown and a sure and heavy yielder. This variety took Grand Sweepsteaks at the National Corn Exposition of 1907 for best 10 ears yellow dent. Won at Iowa Corn Show Des Moines, December, 1909, for best yield from one acre with 153 bushels 46 lbs. Ears are 8 to 11 inches long and 7 to 8 inches in circumference, cob is large with deep kernels, it often shells 88% grain. We would not recommend this corn more than 50 to 100 miles north of the southern boundary of Wisconsin; it seldom fails to produce a crop with us. Price per peck \$1.00; bushel \$3.00.

CLARK'S YELLOW DENT,

(Wisconsin No. 1)

One of the newer varieties of yellow dent. Originated with Mr. Ben Clark, Walworth county, Wisconsin. Ears 8 to 10 inches long and 6 to 7 inches in circumference. Stalks medium to large carrying one ear each. About 10 to 15 days earlier than Reids Yellow Dent. Price, peck \$1.00; bushel \$3.00.

SILVER KING.

(Wisconsin No. 7.)

A new but well known white dent widely grown over the southern half of Wisconsin; is a good yielder and it has placed Wisconsin first in the list of states west of Ohio for yield per acre. Ears 8 to 9 inches long and 7 to 8 inches in circumference; stalk medium height but stocky, often carrying two ears. Price, peck \$1.00; bushel \$3.00

THE UNIVERSITY OF WISCONSIN

Agricultural Experiment Station

This Certifies that the Nursery Premises of

KELLOGGS NURSERY

M. S. Kellogg, Prop., Janesville, Wis.

Have been inspected in accordance with Chapter 468, Laws of Wisconsin, 1909, and have been found apparently free from the San Jose' Scale and other injurious insects, and fungus diseases, and

License is hereby granted to the owners of herein named nursery to sell and ship nursery stock which has been duly inspected, for one year ending October 1, 1910, provided that an official tag upon which a certified copy of this license has been printed, is attached to each package, box or carload lot so sold or shipped.

This certificate-license void after Oct. 1, '10.

H. L. RUSSELL, Director.

A. J. ROGERS, Jr.

Nursery and Orchard Inspector in charge.

We certify that the contents of this package have been officially inspected, and pronounced apparently free from the above specified insects or plant diseases.
